FITS GROUP

The best way for us to build a lasting relationship, with you the customer, is to give exactly the product, you want, when you want it!

HISTORY:

Fits Group was founded in 1993 as a supplier to the promotional distributors. At the time, we offered apparel items: polo shirts, woven shirts, aprons, jackets, knives, etc.

Shortly thereafter we built a stock line of uniform items to offer. We produced chef apparel, medical apparel, aprons, vests, cobbler shoes, and continued to do many import projects for the distributors.

In the last several years, Fits has become a leading importer of custom apparel, and other products such as neon clocks, shop stools, work gloves, and several safety items.

We have been in the import business for over 30 years and in the promotional business for 40 years, with extensive background in importing. We bring our contacts, relationships, and experience to the distributors as an option for sales and marketing needs. We feel we understand most of the problems you deal with, and we offer solutions.

We look forward to the opportunity of being your direct overseas importer.

We bring the world to you:

- OVERSEAS FACTORY DIRECT.
- LOW MINIMUMS & LOW PRICING.
- TOTAL VERSATILITY IN PRODUCT DESIGN.

Fits Global Sourcing provides a smart overseas alternative for your company's product needs. By applying our vast network of manufacturing resources and joint ventures, we deliver outstanding products at very competitive prices. We match our low prices with our high attention to detail and quality, thus providing trouble-free, timely delivery.

We have passports to prove it:

Overseas manufacturing procedures and practices are different from domestic operations. We have decades of hands-on experience in both overseas importing and manufacturing. **We have developed a detailed multi-step process that is used to complete every order. This provides you with a trouble-free import experience.**

We keep the best company:

At Fits Group Global Sourcing, we utilize several the same factories that produce for large U.S. and European retailers. These retailers have long known the huge benefits in cost and quality by having their products produced overseas. **Now, you too, can experience this same value and quality, at low cost.**

We meet your deadlines:

Overseas sourcing presents several unique challenges due to several factors. Therefore, we utilize the latest technologies and advancements in global communications and shipping to take the “distance” out of direct overseas sourcing. **Your order will be custom designed, manufactured, and delivered to your destination in a specified timeline.**

All in the details:

Getting the product right means paying very close attention to all the details. Therefore, we supply pre-production samples for final approval before the start of manufacturing your order. These samples represent the exact product you will receive.

Three pre-production samples:

1. One sample for your customer
2. A second sample for us
3. A third sample that goes to the independent inspectors, so they have an exact guide with specification sheets to guarantee your order is 100% correct.

If there is a problem, it gets fixed before leaving the factory. (100% Customer satisfaction guaranteed.)

Value is our business:

An overseas order can be a large expenditure for your company, but by working with Fits Group, **you'll get lower costs and the highest quality delivered in a timely manner.** This value is seen in every product we offer.

We eliminate the complications:

We hate surprises as much as you. By implementing our multi-step process, we make ordering and receiving your product as effortless and surprise free as possible. We guide you through the entire process then take great pains to assure that the product and delivery are on time and to your quality standards.

**Logistics expertise enables us to deliver on-time,
no matter the deadline!**

**Fits Group Global Sourcing
has decades of hands-on
experience in overseas
importing and manufacturing.**

**It has a proven multi-step,
goof proof process to
complete every single order,
providing a trouble-free
import experience.**
